## **CAL OES EMERGENCY MANAGEMENT CERTIFICATION AND CREDENTIALING VISION**

The California Office of Emergency Services (Cal OES) strives to provide a state recognized pathway for those seeking professional standards in Emergency Management. Cal OES in conjunction with the California Specialized Training Institute (CSTI) has implemented new Emergency Management Professional Development Certification and Emergency Operations Center (EOC) Position Credentialing Programs. Features of these programs include a multi-level emergency management professional certification program and a standardized path for individuals to serve in specific roles in the EOC.

The Emergency Management Certification and EOC Position Credentialing Program is a user driven process, based on national standards. The process consists of several elements including:

- Training
- Education
- Work Experience
- Testing
- Validation

Certifications and Credentials are valid for a period of time and require a continuing education and/or refresher component.

The Cal OES Emergency Management certification and credentialing program has been designed to align with several other State and Federal projects including:

- The FEMA National Emergency Management Basic Academy
- California Incident Command Certification System
- Standardized Emergency Management System
- National Incident Management System

## INTRODUCTION AND OVERVIEW

California's public, private, volunteer, and tribal emergency services personnel serve their communities with professionalism and dedication. The potential for communities to require disaster assistance has significantly increased. Cal OES' EOC Position Credentialing Program promotes an enhanced level of readiness and response for day-to-day emergencies and catastrophic disasters by ensuring qualified and competent staffing for EOCs, Department Operations Centers (DOCs), and support centers.

The need for emergency services staff to deploy outside their jurisdiction has placed additional demands on emergency services systems. Existing mutual-aid systems must guarantee swift and successful support by deploying qualified emergency services personnel to any domestic emergency/disaster.

Cal OES' EOC Position Credentialing Program helps promote elements of the Standardized Emergency Management System (SEMS) and is designed to flow into the larger effort of the National Incident Management System (NIMS) Guidelines for the Credentialing of Personnel. The NIMS Guidelines require states to initiate development of a State/Territory/Tribal system (that incorporates local jurisdictions) to credential emergency management/response personnel to ensure proper authorization and access to an incident including involving mutual aid agreements and/or assistance agreements<sup>1</sup>. By following the framework of the Federal Guidance, California's program will facilitate a seamless transition into a national system.

Cal OES' EOC Position Credentialing Program promotes effective and efficient personnel resource management, and enhances the level of professionalism and capabilities for emergency services personnel. The type I and II programs also support the Emergency Management Mutual Aid (EMMA) and Emergency Management Assistant Compact (EMAC) efforts while meeting SEMS/NIMS requirements. Cal OES' EOC Position Credentialing Program's net effect will help reduce loss of life, and damage to the environment and property during an emergency/disaster.

### AUDIENCE

The type II program<sup>2</sup> is a benchmark standard for local government. Local Government, within SEMS, is defined as city, county, special districts and tribal governments in California. However, the training standards outlined in this book may be used by any California EOC. "Any" includes EOCs and DOCs run by special districts (school districts, utilities districts, and so on), private organizations (businesses, non-governmental organizations, charities, and the like), Tribal entities and State agencies. The type I and II programs are designed to credential those who may be deployed for either EMMA or EMAC request purposes. Personnel seeking this credential are professionals who have hands-on experience working in EOCs during real life disasters, emergencies and planned events.

---

<sup>1</sup> Guidance Document, November 21, 2008

<sup>2</sup> For information on the type I & III programs, please review the audience section of the type I & III standards books

## PURPOSE

A statewide EOC Position Credentialing Program provides Emergency Managers a way to identify measures for EOC position competencies. Additionally, a statewide EOC Credentialing Program documents professional qualifications, certifications, training, and education requirements that define basic criteria expected of emergency services personnel for effective EOC management and operations.

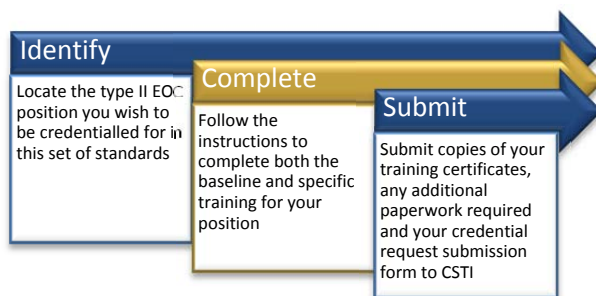

Cal OES' EOC Position Credentialing Program verifies emergency service personnel qualifications and certifications. However, the program does not provide automatic access to EOCs or identification of personnel. The process for requesting resources for certain EOC positions is accomplished through the Standardized Emergency Management System (SEMS) resource request process.

## PROCESS

NIMS and SEMS compliance includes the entire spectrum of emergencies from day-to-day emergencies to catastrophic. The intent of SEMS/NIMS is to ensure all government levels, tribal, private organizations, non-governmental, faith-based, and community-based organizations can work together effectively by using the same organizational structures, terminology, procedures, and systems.

Cal OES's EOC Position Credentialing Program is based on the NIMS Guidelines for the Credentialing of Personnel<sup>3</sup> and Homeland Security NIMS Training Program. To obtain Cal OES Credentials, emergency service personnel must comply with the certification and qualification standards for each EOC position desired, and follow the Cal OES EOC Position Credentialing Program guidelines. Professionals must achieve all requirements of the Type III program prior to advancing to the Type II program.

Cal OES' EOC Position Credentialing Program is consistent with SEMS regulations and guidelines. SEMS regulations §2428 (a) and (b) require emergency services personnel to demonstrate and maintain minimum SEMS performance training objectives. SEMS regulations §2443 states local governments must use SEMS to be eligible for state funding. For Cal OES type II EOC position credentialing, applicants must:

*Figure 1 – Cal OES EOC Credential Process*

---

<sup>3</sup> August 2011

## POLICY

Participation in the Cal OES EOC credentialing program is voluntary. However, credentialing EOC staff helps to ensure that personnel possess the minimum knowledge, skills and experience necessary to execute emergency management EOC activities safely and effectively.

Only those with a Type II or I credential will be considered for EMMA and/or EMAC deployment.<sup>4</sup>

## DOCUMENTATION STANDARDS

Documentation (i.e. course certificates) submitted to the state EOC credentialing program must be issued by any of the consortium members referenced on the Cal OES website as being training partners of CSTI.

Initial documentation considered for the credentialing program must have been obtained within the past five (5) years. Equivalency requests may be submitted to CSTI for review and consideration using the process outlined in the equivalency section of this set of standards.

## RECERTIFICATION

The recertification requirement may be met by documenting actual incident experiences in a position, filling equivalent local EOC section/positions, drills, exercises or other refresher training in subject matter, position and/or function listed above within a four (4) year period.

Advancement to the Type II credential, within the original five (5) year period of the Type III credential, will automatically reset the recertification timeline as of the date the Type II credential is issued by Cal OES.

## JOB SHADOWING

Job shadowing in local EOC's can be an effective way for personnel in training to gain valuable operational experience. Job shadowing of EOC positions is allowed based on the approval of the host EOC and is *NOT* required for the host EOC. Additional information regarding recommended processes for job shadowing are included in the *EOC Position Credentialing Program Resource Guide*.

---

<sup>4</sup> A five year grace period will be in effect for EMMA and EMAC deployments from July 1, 2016 until July 1, 2021 to meet the needs of local government during disaster situations.

## POSITIONS & CORE CURRICULUM

Type II credentialing will prepare EOC staff not only to work in their local EOC but also be deployed during Emergency Management Mutual Aid (EMMA) and Emergency Management Assistance Compact (EMAC) requests. For Type II positions a Type III credential must be acquired prior to completing the Type II core curriculum, position specific training and hands on experience requirements.

### EOC CREDENTIALLED POSITIONS

Basic EOC positions that may exist in an EOC organized under the Incident Command System (ICS) have been identified as a standard which can be used in any EOC. These positions are offered as credentialed positions within the Cal OES EOC credential program.

The ICS model for organizing an EOC is not the *ONLY* way to organize an EOC. Jurisdictions may use the State Emergency Function (EF) structure or Federal Emergency Support Function (ESF) structure. You may contact your local Office of Emergency Services (OES) and ask which credentialed positions may correlate to positions in these structures.

Additionally, some positions may be named the same as the structure provided but might be located in a different section or branch than noted. For this reason, the EOC credentialing program is based on the position (not the section). Your local OES will be able to identify these differences for you and suggest which credentialed position you should choose for the tasks you will be asked to perform in **your EOC**.

During EMMA & EMAC deployment, personnel requesting to fill positions should inquire during the Mission Tasking process as to which SEMS function their position may be located in within the requesting EOC.

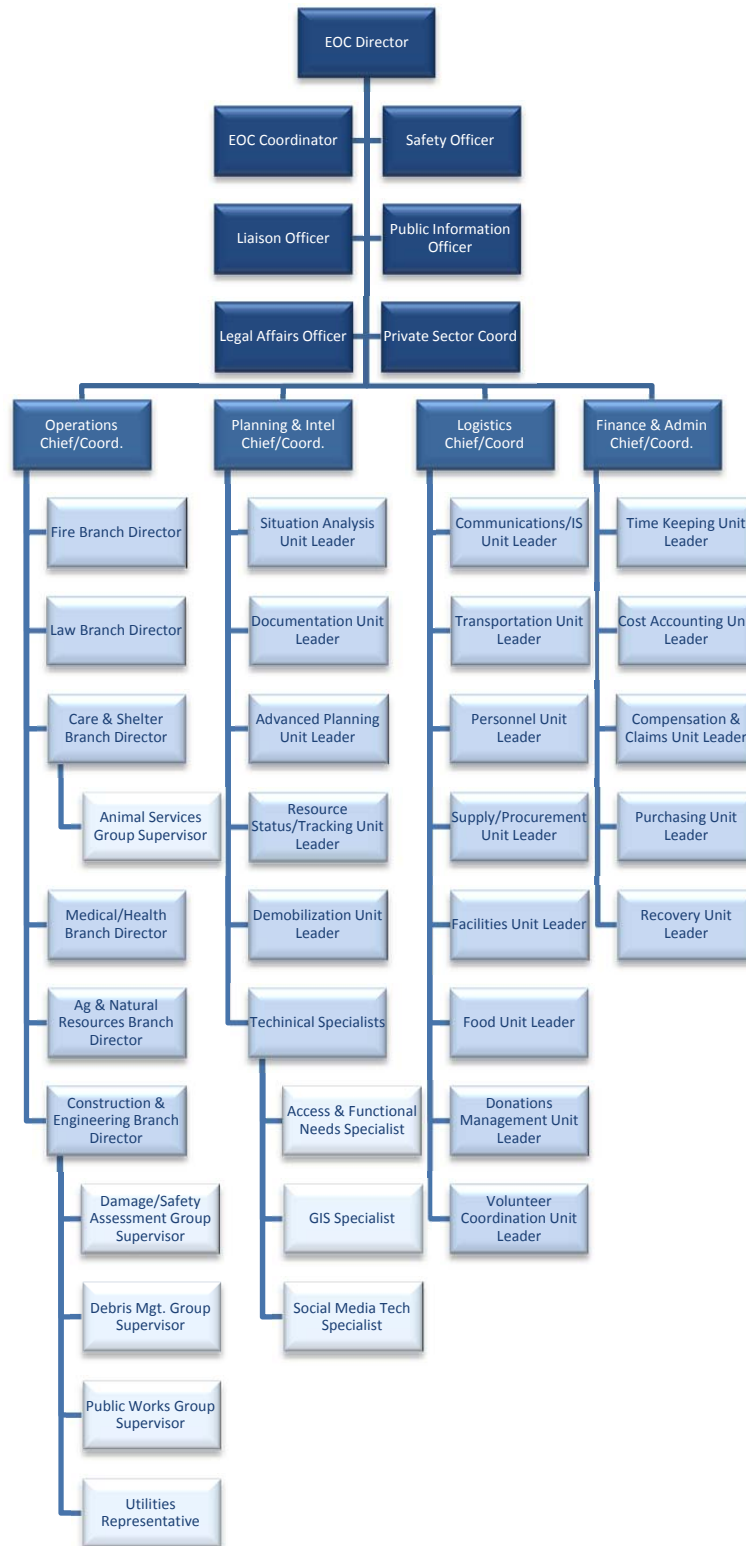

Figure 2 – Cal OES Type II Credentialed EOC Positions<sup>5</sup>

<sup>5</sup> The EOC Credentialing Program is based on the position not the section

## BASLINE COURSEWORK

Type II Credentialed personnel are considered eligible for deployment to requesting jurisdictions during events when EMMA and EMAC are being used. As such, all Type II EOC credentialed staff **MUST** fulfill all requirements of the Type III program prior to receiving their credential. Type II and Type III requirements may be submitted simultaneously for a position.

While EMMA and EMAC deployment are *NOT* a requirement, if you are a Type II credentialed EOC staff member, it may be something you wish to participate in. To ensure that Type II credentialed personnel have a working knowledge of both systems, they **MUST** submit a letter documenting completion of the following tasks:

- Have navigated through the “How EMAC Works” section of the NEMA EMAC website - <http://www.emacweb.org/index.php/learnaboutemac/how-emac-works>
- Have read the Cal OES EMMA Plan
- Have assembled a personal go-kit for possible EMMA deployments

The FEMA Professional Development Series includes seven Emergency Management Institute Independent study courses that provide a well-rounded set of fundamentals for those in the emergency management profession. IS-230.d is included in as a Baseline course in the Type III program. The remaining six courses are considered baseline coursework for the Type II program.

## EQUIVALENCIES

Those wishing to substitute past coursework should send a letter outlining the substitution requested to CSTI. Substitutions will be granted on a case by case basis. CSTI reserves the right to request Course syllabus, description and certificate of completion for individual assessment. Examples of coursework which may be accepted include:

- FEMA E/L-series courses
- Incident Management Team courses
- MEPP Certification

## EOC ACTIVATION & EXAM

An essential part of the Type II Program is gaining hands-on-experience in an EOC setting during an emergency response. To fulfill this part of the Cal OES EOC credentialing program you must complete both of the following:

Fill the position you are applying for credentialing for, for at least two Operational Periods in an EOC during two separate emergencies or planned events. Documentation of this experience will be provided to CSTI as either a *Fully Satisfactory* evaluation from the position supervising you<sup>6</sup> in the EOC or the revised ICS 226 form located in the Appendices.

Pass an on-line competency exam related to the position with a score of 70% or higher

---

<sup>6</sup> **Note:** your supervisor need not have a Cal OES EOC credential to verify your experience.

## POSITION SPECIFIC CURRICULUM

In addition to the Core Curriculum listed in the previous chapter, each Type II position has training that is specific to the tasks performed by the position within the EOC.

### MANAGEMENT

The Management Section of the EOC has seven Cal OES credentialed positions.

**Note:** the Liaison Officer position does not require any additional course work.

Figure 4 – EOC Management Positions

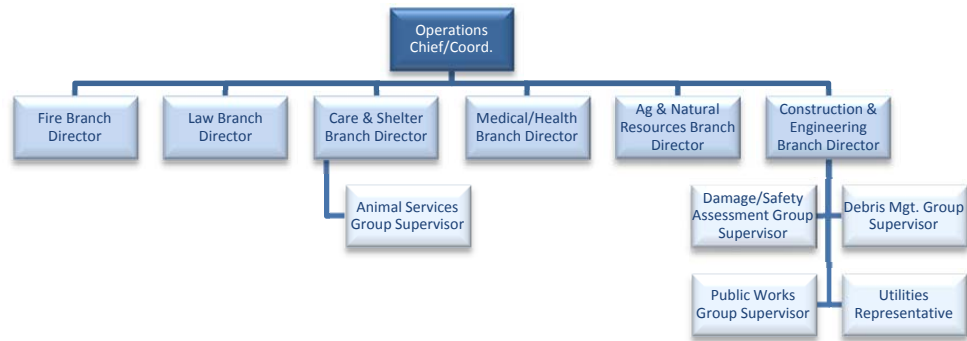

The following matrix outlines the additional training required for the Management positions:

	EOC Director	EOC Coordinator	Safety Officer	Public Information Officer	Legal Affairs Officer	Private Sector Coordinator
IS-200 – ICS for Single Resources	✓	✓				
G-270.4 – Disaster Recovery	✓					
ICS-300 – Intermediate ICS	✓	✓
